The reason why researcher go through so many problems is that combustion in car engines is different from the tutorial I have written. You can use some of the tutorials methods but not all. What is more important if you can take a cross section plane located at the mid sectional plane of the cylinder and plot some volume fractions contours.

I am want PhD work on IC engine (SI engine) analysis. I am quite new to Fluent. I did some basic things using mixing of fluids etc. But I can't get any for mixing to fuel or more tutorials for IC engine combustion etc. I want to analyze The flow and combustion in IC engine using different new fuel.
